OBJECTIVE

Software Engineer with 3+ years of experience in Java, seeking full-time Software Engineer roles.

EDUCATION

Bachelor of Information Technology, Ho Chi Minh City University of Science - GPA 8.03/10

SKILLS

Technical Skills

- Programming Languages & Frameworks:** Java & ReactJS, Java Spring's Ecosystem.
- Databases & Tools:** PostgreSQL, MongoDB, Redis & Bitbucket, Jira, Scrum Agile.
- Architecture Patterns:** Microservices Architect, Event-Driven Architect, AWS SAM.
- Cloud Provider & Message Brokers:** AWS & RabbitMQ, Kafka.
- Container Platform & Orchestration Tools:** Docker & Kubernetes, AWS ECS.

Soft Skills Communication, Collaboration, Time management, Adaptability.

EXPERIENCE

Backend Engineer
Ari Technology Joint Stock Company

July 2021 - May 2023
Tan Binh District, Ho Chi Minh City

- Achieved 30% growth for Doxa Connex 2.0 by designing and implementing a robust, scalable microservices architecture using Java Spring Boot and ReactJS, while optimizing API response times with Redis.
- Developed and integrated new cutting-edge features with Java Spring Boot, ReactJS and Nodejs, significantly boosting the flexibility and reliability of Doxa Connex 2.0 and Uhouse by 30% and 20%, respectively.
- Implemented robust APIs to trigger complex processes within the client's ERP system and Doxa Connex 2.0.

Senior Software Engineer	May 2023 - now
Doxa Holdings International Pte Ltd.	5A Tyrwhitt Rd, Singapore

- Implemented new enhancements and developed features for Doxa Connex 2.0 and Doxa Remind Scheduler using Java Spring Boot, Nodejs and ReactJS. Reviewed pull requests for team members, managed UAT deployments.
- Developed and maintained H2H (Host-to-Host) Bank Integrations via SFTP with PGP encryption, including ongoing support of DBS, OCBC, UOB, Maybank and new H2H integration with Standard Chartered Bank.
- Collaborated with Implementation Specialists, Business Analysts, and Product Owners to resolve production incidents, improving system uptime by 15% and reducing critical incident resolution time by 25%.

PROJECTS

Doxa Connex 2.0 A procurement, payment, financing, analytics platform for Construction and Real Estate Developers. Over 1,000 companies joined in on Doxa Connex 2.0. And processed over \$10,000,000 of invoices to date, with enterprise-grade security recognised by local banks! ([Try it here](#))

Doxa Remind Scheduler A Serverless Application Model (SAM) that leverages AWS EventBridge to periodically trigger AWS Lambda functions for executing complex queries. The results are subsequently employed to dispatch email notifications to end users via AWS SES, reminding them of critical tasks.

Uhouse A real estate management platform that enables organizations to efficiently manage their properties, including contracts, revenue streams, tenants, and equipment.

CERTIFICATES

- AWS Certified Solutions Architect – Associate ([View my achievement here](#))
- AWS Certified Developer – Associate ([View my achievement here](#))
